WHY CONSIDER A CUSTOM SOLUTION?

Neglecting your chimney crown can lead to serious structural issues such as deterioration of masonry, loose and falling bricks, and more! But why consider a custom solution for your home instead of a standard chimney cap or covering?

A CHIMNEY'S SIGNS OF TROUBLE FOR HOMEOWNERS

Depending on the age and construction of your home, standard chimney caps may not be an option. We can customize options to any shape and size that best suits the needs, and style, of your unique home.

Additionally, standard, plain chimney caps won't match the exterior of your beautiful home! There are many available custom options with wide ranges of finishes, and styles for your chimney. We can match your exact specifications to improve the appearance and value of your home!

A chimney with spalled bricks creates a safety hazard for your home, and family.

Protecting your chimney with a properly installed custom solution by a professional Chimney Technician can also significantly reduce wear and tear, thus preventing serious structural damage that could lead to costly repairs in the future!

OUR SOLUTIONS

OUR POT TOPPERS

Our custom Chimney Pot Toppers are designed to protect your existing clay chimney pots! Installing these beautiful pot toppers adds style and increases your chimney flue's performance. They are made from copper, stainless steel, or galvanized steel and feature square, round, or octagonal lids. Don't have clay chimney pots? Ask us about available options!

OUR CHASE COVERS

Defects in your chimney, no matter how small, can lead to further erosion of your chimney's structural integrity that can pose a threat to your home, and family.

Chase Covers ensure that your chimney is protected from the elements and prevent harmful external moisture from compromising your chimney system's efficient operation.

OUR MULTI-FLUE CAPS

Our Multi-Flue Caps not only create a clean look for your chimney crown, but they also consolidate maintenance and make it much easier to maintain multiple chimney flues! Often, single chimney caps are used for multiple flues resulting in an uneven and crowded appearance. These can be difficult to work with, create issues with wear and tear on the chimney, and can be very unattractive!

We will level out your flues and encase all of them in a beautiful Multi-Flue Cap for easy care, and a more consistent, clean appearance.

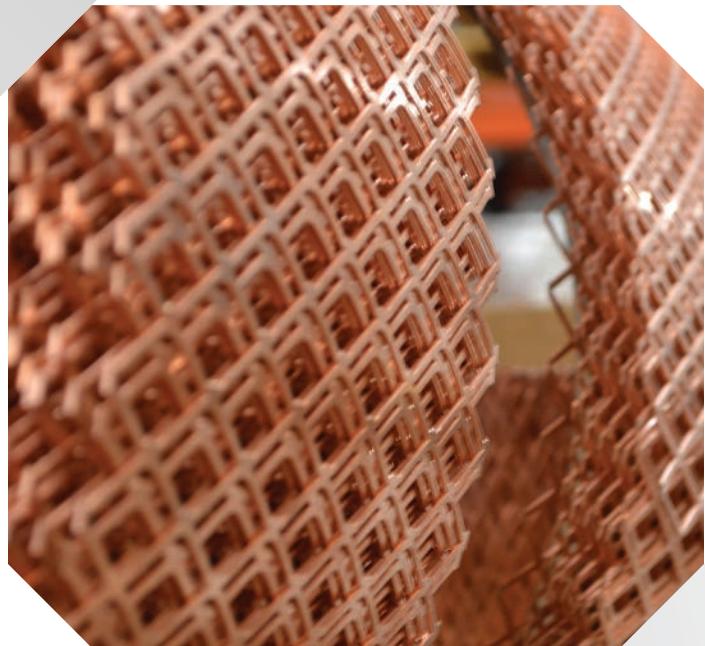

FABRICATION PROCESS

HIGH QUALITY MATERIALS & SUPERIOR CRAFTSMANSHIP

We understand the pride in having a beautiful looking home, and the importance of having every aspect perfectly detailed to your own specifications. You can trust that you have the highest-quality product installed on your home, that will stand the test of time!

We proudly install hand fabricated, American made, custom metal products to meet any demand for your home! Our metal fabrication shop takes pride in its ability to craft superior product with precision and care, using only the highest-quality materials.

Professionally built to any shape, style, and color to meet your individual needs, we aim to exceed your expectations. We guarantee your home will receive the best custom metal product available!

INSTALLATION PROCESS

Protecting your home during the installation process is our top priority! We take every precaution to ensure the safety of your home, our technicians, and your new custom metal product.

Depending on the roof pitch, location of the chimney, and many other factors, we may need to take additional safety measures to ensure a safe and successful installation. This can include setting up scaffolding, utilizing a boom truck lift, and following other important safety measures.

Installations may take several days depending on the setup, and scope of the project. Additionally, adverse weather conditions can also play a part in determining the length of the installation process. Regardless of the challenges, your professional Chimney Technician will communicate with you every step of the way!

Our primary concern is always the safety and well-being of your home! We take pride in leaving a job site clean, tidy, and in better shape than when we arrived.

HOW TO SELECT MULTI-FLUE COVERS

STEP 1 SELECT YOUR MATERIAL

Copper

Galvanized Steel

Stainless Steel

Choose from Copper, Galvanized Steel or Stainless Steel. Your professional Chimney Technician can guide you through the best options for your home!

- Galvanized Steel is only available with powder coating.
- Stainless Steel is available with or without powder coating.

STEP 2 SELECT YOUR LID STYLE

Flat

Hip

Hip & Ridge

A Flat lid is a traditional style that keeps wind, rain, and snow out of the existing chimney flues.

A Hip style lid may be better suited for airflow and efficiency, depending on the spacing and size of your chimney.

A Hip & Ridge combination style lid can provide proper air flow, circulation, and create efficiencies for your chimney.

There are two types of Hip & Ridge lids to choose from: standing seams or no standing seams. Multi-Flue Caps with standing seams have longer lead times. Consult your Chimney Technician for further details.

STEP 3 SELECT YOUR BASE STYLE

Top Mount

A Top Mount style cap easily installs on the top of your chimney's cement crown.

Outside Mount

The Outside Mount style cap includes a 'skirt' which is placed over, and encases the top of the chimney crown.

STEP 4 SELECT YOUR SCREEN HEIGHT

AVAILABLE SCREEN HEIGHTS	UPCHARGE
8"	NO

ASK US ABOUT CUSTOM CLAY CHIMNEY POTS!

WHAT OUR CUSTOMERS SAY...

“ **The company was more affordable** than others that estimated the custom work I wanted. They were right on time, and worked until the job was done. Both guys that worked for me that day were very nice and professional and answered any questions I had. I've used them before, and I'd use them again without a second thought. Highly recommend! **”**

– Linda C.

“ **They showed up when they said they would,** did exactly what they said they were going to do, did it correctly and cleaned up when they were done. As a result, we now have the fireplace restored, and a wonderful cap installed and we could not be happier as we enjoy a fire on a cold winter night. Everything about our experience was top drawer. They turned a complete disaster into a great experience with a very happy outcome. These guys are expert, professional craftsmen who care about the customer and the end product. I highly recommend them. **”**

– Dana S.

WHAT OUR CUSTOMERS SAY...

“ Installed three chimney caps, all to our specifications.

Great experience! Clean and professional crews, maintained the worksite in good order through the whole process. Installed three chimney caps, all to our specifications. Highly recommend! Good quality workmanship. ”

– Shaun C.

“ Absolute professionalism. If you're looking to have any maintenance or custom work done on your fireplace and chimney, do yourself a favor and call them. I was treated with respect and the work was done exactly as one would expect. There's simply no other company I would ever consider! ”

– Andrew S.
